

## **Crunch-Care Expands Nanny, Babysitting, and Care Giver Services to Orange County**

Orange County, California (May 25, 2011) - Crunch Care, a premier nanny, babysitter and caregiver referral agency, recently announced that it has expanded its services to Orange County, California.

Families looking for a nanny, babysitter, or general caregiver in Orange County or South Los Angeles County can call Crunch Care to find the best care available. With years of experience in interviewing, evaluating, screening, and helping families with their in-home care needs, Crunch-Care services are a valuable resource for the local community.

Crunch Care was established in San Diego and expanded to South Florida. After successfully serving the San Diego and South Florida communities, Crunch Care now has expanded its business to Orange County. This is Crunch Care's second in California and third location in the country. The new office is located in Laguna Niguel, offering services throughout Orange County and South Los Angeles County.

This new expansion is a clear indicator of Crunch Care's ability to add value to its customers' needs. "We are further committed to meeting the in-home care demands of our clients and to continuing to provide unparalleled service and support as we expand into new communities" said Stacie Steelman, President and Founder, Crunch Care, Inc.

As a mom-inspired company with a corporate recruiting training and philosophy, they know what to look for when trying to find a caregiver. Positions they focus on are nannies, babysitters, night nurses, senior companions, and post-surgical caregivers.

What makes Crunch Care different is that they tailor the search to the needs of the client. Crunch Care's team understands that everyone's needs are different so they meet in person with both families and caregivers. They carefully screen all candidates before sending over to meet with a family. Crunch Care provides both short and long term services based on requirements of the client.

Kelly Welker, President of the newly added Crunch Care (Orange County) said "I'm excited to join Crunch Care because of their long standing and excellent history of serving clients with in-home care needs; their belief in hearing the customer and providing them with a custom solution based on their specific needs."
